JULY 1983 VOLUME 72 NUMBER 1

1 Platelets have more than one binding site for von Willebrand factor. *Z. M. Ruggeri, L. De Marco, L. Gatti, R. Bader, and R. R. Montgomery*

13 Role of Ca^{2+} in secretagogue-stimulated breakdown of phosphatidylinositol in rat pancreatic islets. *K. V. Axen, U. K. Schubart, A. D. Blake, and N. Fleischer*

22 Erythrocytes in sickle cell anemia are heterogeneous in their rheological and hemodynamic characteristics. *D. K. Kaul, M. E. Fabry, P. Windisch, S. Baez, and R. L. Nagel*

32 Killing of intracellular *Leishmania donovani* by human mononuclear phagocytes. Evidence for oxygen-dependent and -independent leishmanicidal activity. *H. W. Murray and D. M. Cartelli*

45 Cholesterol feeding increases low density lipoprotein synthesis. *C. J. Packard, L. McKinney, K. Carr, and J. Shepherd*

52 Lymphocyte phenotype and function in pseudolymphoma associated with Sjögren's syndrome. *R. I. Fox, T. C. Adamson III, S. Fong, C. A. Robinson, E. L. Morgan, J. A. Robb, and F. V. Howell*

63 Effects of cyclooxygenase inhibitors on the alterations in lung mechanics caused by endotoxemia in the unanesthetized sheep. *J. R. Snapper, A. A. Hutchison, M. L. Ogletree, and K. L. Brigham*

77 Mineralocorticoid modulation of rabbit medullary collecting duct acidification. A sodium-independent effect. *D. K. Stone, D. W. Seldin, J. P. Kokko, and H. R. Jacobson*

84 Functional improvement of jeopardized myocardium following intracoronary streptokinase infusion in acute myocardial infarction. *R. S. Stack, H. R. Phillips III, D. S. Grierson, V. S. Behar, Y. Kong, R. H. Peter, J. L. Swain, and J. C. Greenfield, Jr.*

96 Gluten-sensitive enteropathy. Immunoglobulin G heavy-chain (Gm) allotypes and the immune response to wheat gliadin. *J. B. Weiss, R. K. Austin, M. S. Schanfield, and M. F. Kagnoff*

102 Vitamin D deficiency, hypocalcemia, and increased skeletal muscle degradation in rats. *S. J. Wassner, J. B. Li, A. Sperduto, and M. E. Norman*

113 Role of cell surface contact in the kinetics of superoxide production by granulocytes. *C. A. Dahinden, J. Fehr, and T. E. Hugli*

122 Human airway monohydroxyeicosatetraenoic acid generation and mucus release. *Z. Marom, J. H. Shelhamer, F. Sun, and M. Kaliner*

128 Endothelial characteristics of glomerular capillaries in normal, mercuric chloride-induced, and gentamicin-induced acute renal failure in the rat. *R. E. Bulger, G. Eknoyan, D. J. Purcell II, and D. C. Dobyan*

142 Composition of human colonic mucin. Selective alteration in inflammatory bowel disease. *D. K. Podolsky, and K. J. Isselbacher*

154 Starvation and hypothyroidism exert an overlapping influence on rat hepatic messenger RNA activity profiles. *F. E. Carr, S. Seelig, C. N. Mariash, H. L. Schwartz, and J. H. Oppenheimer*

164 Dynamic regulation of leukocyte beta adrenergic receptor-agonist interactions by physiological changes in circulating catecholamines. *R. D. Feldman, L. E. Limbird, J. Nadeau, G. A. FitzGerald, D. Robertson, and A. J. J. Wood*

171 Inhibition of phagocytosis of complement C3- or immunoglobulin G-coated particles and of C3bi binding by monoclonal antibodies to a monocyte-granulocyte membrane glycoprotein (Mo1). *M. A. Arnaout, R. F. Todd III, N. Dana, J. Melamed, S. F. Schlossman, H. R. Colten*

180 Cytochrome a,a_3 reoxidation. Early indicator of metabolic recovery from hemorrhagic shock in rats. *K. Kariman, F. F. Jöbsis, H. A. Saltzman*

192 Activation of the respiratory burst enzyme in human polymorphonuclear leukocytes by chemoattractants and other soluble stimuli. Evidence that the same oxidase is activated by different transductional mechanisms. *L. C. McPhail and R. Snyderman*

201 Isolation and characterization of a mutant liver aldolase in adult hereditary fructose intolerance. Identification of the enzyme variant by radioassay in tissue biopsy specimens. *T. M. Cox, M. W. O'Donnell, M. Camilleri, and A. H. Burghes*

214 High affinity esterification of eicosanoid precursor fatty acids by platelets. *E. J. Neufeld, D. B. Wilson, H. Sprecher, and P. W. Majerus*

221 Studies on the production of low density lipoproteins by perfused livers from nonhuman primates. Effect of dietary cholesterol. *F. L. Johnson, R. W. St. Clair, and L. L. Rudel*

237 Interferon-induced differentiation of U937 cells. Comparison with other agents that promote differentiation of human myeloid or monocytelike cell lines. *T. Hattori, M. Pack, P. Bougnoux, Z.-L. Chang, and T. Hoffman*

245 Membrane microviscosity is increased in the erythrocytes of patients with adrenoleukodystrophy and adrenomyeloneuropathy. *R. A. Knazek, W. B. Rizzo, J. D. Schulman, and J. R. Dave*

249 Human plasma epidermal growth factor/β-urogastrone is associated with blood platelets. *Y. Oka, D. N. Orth*

260 Immunochemical analysis and immunogenicity of the type II group B streptococcal capsular polysaccharide. *D. L. Kasper, C. J. Baker, B. Galdes, E. Katzenellenbogen, and H. J. Jennings*

270 Neuroendocrine responses to glucose ingestion in man. Specificity, temporal relationships, and quantitative aspects. *T. F. Tse, W. E. Clutter, S. D. Shah, J. P. Miller, and P. E. Cryer*

278 Mechanisms of postprandial glucose counterregulation in man. Physiologic roles of glucagon and epinephrine vis-à-vis insulin in the prevention of hypoglycemia late after glucose ingestion. *T. F. Tse, W. E. Clutter, S. D. Shah, and P. E. Cryer*

287 Modulation of the hydro-osmostic effect of vasopressin on the rabbit cortical collecting tubule by adrenergic agents. *R. K. Krothapalli, W. B. Duffy, H. O. Senekjian, and W. N. Suki*

295 Gastric bicarbonate secretion in humans. Effect of pentagastrin, bethanechol, and 11,16,16-trimethyl prostaglandin E_2. *M. Feldman*

304 Tumoricidal activity of human monocytes activated in vitro by free and liposome-encapsulated human lymphokines. *E. S. Kleinerman, A. J. Schroit, W. E. Fogler, and I. J. Fidler*

316 Deficient guanine nucleotide regulatory unit activity in cultured fibroblast membranes from patients with pseudohypoparathyroidism type I. A cause of impaired synthesis of 3′,5′-cyclic AMP by intact and broken cells. *M. A. Levine, C. Eil, R. W. Downs, Jr., and A. M. Spiegel*

325 A murine monoclonal antibody that completely blocks the binding of fibrinogen to platelets produces a thrombasthenic-like state in normal platelets and binds to glycoproteins IIb and/or IIIa. *B. S. Coller, E. I. Peerschke, L. E. Scudder, and C. A. Sullivan*

339 Correlation of oxygenation with vascular permeability-surface area but not with lung water in humans with acute respiratory failure and pulmonary edema. *K. L. Brigham, K. Kariman, T. R. Harris, J. R. Snapper, G. R. Bernard, and S. L. Young*

350 Effects of verapamil on ventricular tachycardias possibly caused by reentry, automaticity, and triggered activity. *R. J. Sung, W. A. Shapiro, E. N. Shen, F. Morady, and J. Davis*

361 Effect of dietary fat on sympathetic nervous system activity in the rat. *J. H. Schwartz, J. B. Young, and L. Landsberg*

371 Effect of fatty acids on lipid and apoprotein secretion and association in hepatocytes cultures. *W. Patsch, T. Tamai, and G. Schonfeld*

379 Atypical familial dysbetalipoproteinemia associated with apolipoprotein phenotype E3/3. *R. J. Havel, L. Kotite, J. P. Kane, P. Tun, and T. Bersot*

RAPID PUBLICATIONS

388 Insulin binding sites in various segments of the rabbit nephron. *R. Nakamura, D. S. Emmanouel, and A. I. Katz*

393 Recombinant immune interferon increases immunoglobulin G Fc receptors on cultured human mononuclear phagocytes. *P. M. Guyre, P. M. Morganelli, and R. Miller*

398 Interleukin-2 enhances the depressed natural killer and cytomegalovirus-specific cytotoxic activities of lymphocytes from patients with the acquired immune deficiency syndrome. *A. H. Rook, H. Masur, H. C. Lane, W. Frederick, T. Kasahara, A. M. Macher, J. Y. Djeu, J. F. Manischewitz, L. Jackson, A. S. Fauci, and G. V. Quinnan, Jr.*

404 Ketoconazole binds to glucocorticoid receptors and exhibits glucocorticoid antagonist activity in cultured cells. *D. S. Loose, E. P. Stover, and D. Feldman*

409 JULY AUTHOR INDEX

AUGUST 1983 VOLUME 72 NUMBER 2

411 Canine renal receptors for parathyroid hormone. Down-regulation in vivo by exogenous parathyroid hormone. *C. A. Mahoney and R. A. Nissenson*

422 Effects of dietary-induced hyperparathyroidism on the parathyroid hormone-receptor-adenylate cyclase system of canine kidney. Evidence for postreceptor mechanism of desensitization. *J. Tamayo, E. Bellorin-Font, and K. J. Martin*

433 Chronic hyperglycemia with secondary hyperinsulinemia inhibits the maturational response of fetal lamb lungs to cortisol. *D. Warburton*

441 Myeloperoxidase-dependent effect of amines on functions of isolated neutrophils. *E. L. Thomas, M. B. Grisham, and M. M. Jefferson*

455 Regulation of vascular prostaglandin synthesis by metabolites of arachidonic acid in perfused rabbit aorta. *R. S. Kent, S. L. Diedrich, and A. R. Whorton*

466 Angiotensin II-induced hypertension in the rat. Effects on the plasma concentration, renal excretion, and tissue release of prostaglandins. *D. I. Diz, P. G. Baer, and A. Nasjletti*

478 Tolbutamide perifusion of rat islets. Sequential changes in calcium, phosphorus, sodium, potassium, and chlorine in single beta cells. *R. K. Kalkhoff, K. A. Siegesmund, and R. F. Dragen*

483 Adenosine deaminase deficiency with normal immune function. An acidic enzyme mutation. *P. E. Daddona, B. S. Mitchell, H. J. Meuwissen, B. L. Davidson, J. M. Wilson, and C. A. Koller*

493 Heterogeneity of human factor V deficiency. Evidence for the existence of antigen-positive variants. *H. C. Chiu, E. Whitaker, and R. W. Colman*

504 Antibodies of patients with Lyme disease to components of the *Ixodes dammini* spirochete. *A. G. Barbour, W. Burgdorfer, E. Grunwaldt, and A. C. Steere*

516 Saccharides mediate the attachment of rat macrophages to bone in vitro. *Z. Bar-Shavit, S. L. Teitelbaum, and A. J. Kahn*

526 Defective binding of macrophages to bone in rodent osteomalacia and vitamin D deficiency. In vitro evidence for a cellular defect and altered saccharides in the bone matrix. *Z. Bar-Shavit, A. J. Kahn, and S. L. Teitelbaum*

535 Early membrane damage during coronary reperfusion in dogs. Detection by radiolabeled anticardiac myosin $(Fab')_2$. *L. H. Frame, J. A. Lopez, B. A. Khaw, J. T. Fallon, E. Haber, and W. J. Powell, Jr.*

545 Muscle phosphofructokinase deficiency. Biochemical and immunological studies of phosphofructokinase isozymes in muscle culture. *M. Davidson, A. F. Miranda, A. N. Bender, S. DiMauro, and S. Vora*

551 Neural control of the sphincter of Oddi. A physiological role of 5-hydroxytryptamine in the regulation of basal sphincter of Oddi motor activity in the cat. *J. Behar and P. Biancani*

560 Neoantigen of the polymerized ninth component of complement. Characterization of a monoclonal antibody and immunohistochemical localization in renal disease. *R. J. Falk, A. P. Dalmasso, Y. Kim, C. H. Tsai, J. I. Scheinman, H. Gewurz, and A. F. Michael*

574 Anaphylactic release of a prekallikrein activator from human lung in vitro. *H. L. Meier, A. P. Kaplan, L. M. Lichtenstein, S. Revak, C. G. Cochrane, and H. H. Newball*

582 Defective adenosine triphosphate synthesis. An explanation for skeletal muscle dysfunction in phosphate-deficient mice. *B. D. Hettleman, R. L. Sabina, M. K. Drezner, E. W. Holmes, and J. L. Swain*

590 Differential effects of oral, peripheral intravenous, and intraportal glucose on hepatic glucose uptake and insulin and glucagon extraction in conscious dogs. *T. Ishida, Z. Chap, J. Chou, R. Lewis, C. Hartley, M. Entman, and J. B. Field*

602 Hemolytic disease of the newborn caused by a new deletion of the entire β-globin cluster. *M. Pirastu, Y. W. Kan, C. C. Lin, R. M. Baine, and C. T. Holbrook*

610 Intestinal assimilation of a proline-containing tetrapeptide. Role of a brush border membrane postproline dipeptidyl aminopeptidase IV. *A. Morita, Y.-C. Chung, H. J. Freeman, R. H. Erickson, M. H. Sleisenger, and Y. S. Kim*

617 Specific plasma membrane receptors for reovirus on rat pituitary cells in culture. *E. Maratos-Flier, C. R. Kahn, D. R. Spriggs, and B. N. Fields*

622 Effects of secretin on peritubular capillary physical factors and proximal fluid reabsorption in the rat. *J. I. Mertz, J. A. Haas, T. J. Berndt, J. C. Burnett, Jr., and F. G. Knox*

626 Receptors for bradykinin in intact cultured human fibroblasts. Identification and characterization by direct binding study. *A. A. Roscher, V. C. Manganiello, C. L. Jelsema, and J. Moss*

636 Antigen-induced human T cell help. Precursor frequency, radiation sensitivity, and allogeneic effects. *H. C. Lane, G. Whalen, and A. S. Fauci*

648 Metabolic compensation for profound erythrocyte adenylate kinase deficiency. A hereditary enzyme defect without hemolytic anemia. *E. Beutler, D. Carson, H. Dannawi, L. Forman, W. Kuhl, C. West, and B. Westwood*

656 Elastase and α_1-proteinase inhibitor activity in tracheal aspirates during respiratory distress syndrome. Role of inflammation in the pathogenesis of bronchopulmonary dysplasia. *T. A. Merritt, C. G. Cochrane, K. Holcomb, B. Bohl, M. Hallman, D. Strayer, D. K. Edwards III, and L. Gluck*

667 Urinary calcium excretion in familial hypocalciuric hypercalcemia. Persistence of relative hypocalciuria after induction of hypoparathyroidism. *M. F. Attie, J. R. Gill, Jr., J. L. Stock, A. M. Spiegel, R. W. Downs, Jr., M. A. Levine, and S. J. Marx*

677 Purification and comparison of outer membrane protein P2 from *Haemophilus influenzae* type b isolates. *R. S. Munson, Jr., J. L. Shenep, S. J. Barenkamp, and D. M. Granoff*

685 Genetic regulation of a structural polymorphism of human C3b receptor. *W. W. Wong, J. G. Wilson, and D. T. Fearon*

694 Evidence for genetic restriction in the suppression of erythropoiesis by a unique subset of T lymphocytes in man. *J. M. Lipton, L. M. Nadler, G. P. Canellos, M. Kudisch, C. S. Reiss, and D. G. Nathan*

707 Role in nude mice of interferon and natural killer cells in inhibiting the tumorigenicity of human hepatocellular carcinoma cells infected with hepatitis B virus. *D. Shouval, B. Rager-Zisman, P. Quan, D. A. Shafritz, B. R. Bloom, and L. M. Reid*

718 Hepatic bilirubin uptake in the isolated perfused rat liver is not facilitated by albumin binding. *Y. R. Stollman, U. Gärtner, L. Theilmann, N. Ohmi, and A. W. Wolkoff*

724 Mitochondrial dysfunction induced by fatty acid ethyl esters, myocardial metabolites of ethanol. *L. G. Lange and B. E. Sobel*

RAPID PUBLICATION

732 Norepinephrine-stimulated hypertrophy of cultured rat myocardial cells is an alpha$_1$ adrenergic response. *P. Simpson*

739 CORRECTION

741 AUGUST AUTHOR INDEX

SEPTEMBER 1983 VOLUME 72 NUMBER 3

PERSPECTIVES

743 Lipoprotein receptors in the liver. Controls signals for plasma cholesterol traffic. *M. S. Brown and J. L. Goldstein*

REGULAR ARTICLES

748 Guanine nucleotides modulate the binding affinity of the oligopeptide chemoattractant receptor on human polymorphonuclear leukocytes. *C. Koo, R. J. Lefkowitz, and R. Snyderman*

754 Aldosterone suppression with dopamine infusion in low-renin hypertension. *O. B. Holland, C. Thomas, H. Brown, D. Schindewolf, Y. Hillier, and C. Gomez-Sanchez*

767 Human hypoxanthine-guanine phosphoribosyltransferase. Detection of a mutant allele by restriction endonuclease analysis. *J. M. Wilson, P. Frossard, R. L. Nussbaum, C. T. Caskey, and W. N. Kelley*

773 Intracellular pharmacokinetics of methotrexate polyglutamates in human breast cancer cells. Selective retention and less dissociable binding of 4-NH_2-10-CH_3-pteroylglutamate$_4$ and 4-NH_2-10-CH_3-pteroylglutamate$_5$ to dihydrofolate reductase. *J. Jolivet and B. A. Chabner*

779 Quantitative evaluation of the pattern of shunt flow in the right ventricle and pulmonary artery of dogs with experimental ventricular septal defect. *M. Nakai, T. Tomino, Y. Goto, J. Yamamoto, Y. Matsui, T. Togawa, and K. Ogino*

789 Evidence for role of hydroxyl radical in complement and neutrophil-dependent tissue injury. *P. A. Ward, G. O. Till, R. Kunkel, and C. Beauchamp*

802 Alpha adrenergic-mediated accumulation of calcium in reperfused myocardium. *A. D. Sharma, J. E. Saffitz, B. I. Lee, B. E. Sobel, and P. B. Corr*

819 Defective nuclear accumulation of androgen receptors in disorders of sexual differentiation. *S. Gyorki, G. L. Warne, B. A. K. Khalid, and J. W. Funder*

826 Specifically decreased collagen biosynthesis in scurvy dissociated from an effect on proline hydroxylation and correlated with body weight loss. In vitro studies in guinea pig calvarial bones. *M. Chojkier, R. Spanheimer, and B. Peterkofsky*

836 Muscle protein turnover and glucose uptake in acutely uremic rats. Effects of insulin and the duration of renal insufficiency. *A. S. Clark and W. E. Mitch*

846 Intracellular polymerization of sickle hemoglobin. Effects of cell heterogeneity. *C. T. Noguchi, D. A. Torchia, and A. N. Schechter*

853 Marrow cytometry and prognosis in myeloma. *B. Barlogie, R. Alexanian, E. A. Gehan, L. Smallwood, T. Smith, and B. Drewinko*

862 Abnormality in calcium release from skeletal sarcoplasmic reticulum of pigs susceptible to malignant hyperthermia. *T. E. Nelson*

871 Early enhancement of fluid transport in rabbit proximal straight tubules after loss of contralateral renal excretory function. *K. Tabei, D. J. Levenson, and B. M. Brenner*

882 Insulin resistance in uremia. Characterization of lipid metabolism in freshly isolated and primary cultures of hepatocytes from chronic uremic rats. *J. F. Caro and S. Lanza-Jacoby*

893 Thermic effect of infused glucose and insulin in man. Decreased response with increased insulin resistance in obesity and noninsulin-dependent diabetes mellitus. *E. Ravussin, C. Bogardus, R. S. Schwartz, D. C. Robbins, R. R. Wolfe, E. S. Horton, E. Danforth, Jr., and E. A. H. Sims*

903 Respiratory system impedance from 4 to 40 Hz in paralyzed intubated infants with respiratory disease. *H. L. Dorkin, A. R. Stark, J. W. Werthammer, D. J. Strieder, J. J. Fredberg, and I. D. Frantz III*

911 Thromboxane A_2 mediates lung vasoconstriction but not permeability after endotoxin. *R. Winn, J. Harlan, B. Nadir, L. Harker, and J. Hildebrandt*

919 Lateral hypothalamic lesions and norepinephrine turnover in rats. *T. Yoshida, J. W. Kemnitz, and G. A. Bray*

928 Evidence for concerted effects of aldosterone on a target sodium-transporting epithelium. *R. Beauwens and J. Crabbé*

935 Regional blood flow distribution in dog during induced hypotension and low cardiac output. Spontaneous breathing versus artificial ventilation. *N. Vitres, G. Sillye, M. Aubier, A. Rassidakis, and Ch. Roussos*

948 Synthesis and release of Hageman factor (Factor XII) by the isolated perfused rat liver. *H. Saito, S. M. Hamilton, A. S. Tavill, L. T. Goodnough, L. Louis, and A. Angell*

955 Role of calcium and calmodulin in activation of the oxyntic cell by histamine and carbamylcholine in the guinea pig. *W. Walker, A. Vinik, A. Heldsinger, and R. Kaveh*

965 Regulation of *de novo* purine synthesis in human bone marrow mononuclear cells by hypoxanthine. *M. E. King, J. M. Honeysett, and S. B. Howell*

971 Lymphocyte subsets in measles. Depressed helper/inducer subpopulation reversed by in vitro treatment with levamisole and ascorbic acid. *M. I. Joffe, N. R. Sukha, and A. R. Rabson*

981 Influence of β-adrenergic blockade on glucose-induced thermogenesis in man. *K. Acheson, E. Jéquier, and J. Wahren*

987 Transplacental immunization of the human fetus to tetanus by immunization of the mother. *T. J. Gill III, C. F. Repetti, L. A. Metlay, B. S. Rabin, F. H. Taylor, D. S. Thompson, and A. L. Cortese*

997 Concentrating defect in the adrenalectomized rat. Abnormal vasopressin-sensitive cyclic adenosine monophosphate metabolism in the papillary collecting duct. *B. A. Jackson, J. L. Braun-Werness, E. Kusano, and T. P. Dousa*

1005 Reinitiation of sperm production in gonadotropin-suppressed normal men by administration of follicle-stimulating hormone. *A. M. Matsumoto, A. E. Karpas, C. A. Paulsen, and W. J. Bremner*

1016 Mucolipidosis II and III. The genetic relationships between two disorders of lysosomal enzyme biosynthesis. *O. T. Mueller, N. K. Honey, L. E. Little, A. L. Miller, and T. B. Shows*

1024 Cholesteryl ester accumulation in mouse peritoneal macrophages induced by β-migrating very low density lipoproteins from patients with atypical dysbetalipoproteinemia. *T. P. Bersot, T. L. Innerarity, R. W. Mahley, and R. J. Havel*

1034 "Fibrinogen Tokyo II." An abnormal fibrinogen with an impaired polymerization site on the aligned DD domain of fibrin molecules. *M. Matsuda, M. Baba, K. Morimoto, and C. Nakamikawa*

1042 Structure-activity relationships of heparin. Independence of heparin charge density and antithrombin-binding domains in thrombin inhibition by antithrombin and heparin cofactor II. *R. E. Hurst, M.-C. Poon, and M. J. Griffith*

1046 Mechanisms subserving the trophic actions of insulin on ovarian cells. In vitro studies using swine granulosa cells. *J. D. Veldhuis, L. A. Kolp, M. E. Toaff, J. F. Strauss III, L. M. Demers*

1058 Impaired rat sciatic nerve sodium-potassium adenosine triphosphatase in acute streptozocin diabetes and its correction by dietary *myo*-inositol supplementation. *D. A. Greene and S. A. Lattimer*

1064 Altered myoelectric activity in the experimental blind loop syndrome. *P. G. Justus, A. Fernandez, J. L. Martin, C. E. King, P. P. Toskes, and J. R. Mathias*

1072 Clinical disorders associated with autoantibodies to the insulin receptor. Simulation by passive transfer of immunoglobulins to rats. *R. F. Dons, R. Havlik, S. I. Taylor, K. L. Baird, S. S. Chernick, and P. Gorden*

1081 Protective effects of exogenous secretin on ceruletide-induced acute pancreatitis in the rat. *I. G. Renner, J. R. Wisner, Jr., and H. Rinderknecht*

1093 Characterization of a human blood monocyte subset with low peroxidase activity. *Y. Akiyama, P. J. Miller, G. B. Thurman, R. H. Neubauer, C. Oliver, T. Favilla, J. A. Beman, R. K. Oldham, and H. C. Stevenson*

1106 Rapid development of renal resistance to low doses of synthetic bovine parathyroid hormone fragment 1-34. Dissociation of urinary cyclic adenosine monophosphate, phosphaturic, and calciuric responses. *W. M. Law, Jr. and H. Heath III*

1114 Metabolism of C-peptide in the dog. In vivo demonstration of the absence of hepatic extraction. *K. Polonsky, J. Jaspan, W. Pugh, D. Cohen, M. Schneider, T. Schwartz, A. R. Moossa, H. Tager, and A. H. Rubenstein*

1124 Major histocompatibility restriction of antigen recognition by T cells in a recipient of haplotype mismatched human bone marrow transplantation. *E. Chu, D. Umetsu, F. Rosen, and R. S. Geha*

1130 In vitro lymphocyte proliferation response to therapeutic insulin components. Evidence for genetic control by the human major histocompatibility complex. *D. L. Mann, N. Mendell, C. R. Kahn, A. H. Johnson, and A. Rosenthal*

1139 Harderoporphyria: a variant hereditary coproporphyria. *Y. Nordmann, B. Grandchamp, H. de Verneuil, L. Phung, B. Cartigny, and G. Fontaine*

1150 Impact of obesity on metabolism in men and women. Importance of regional adipose tissue distribution. *M. Krotkiewski, P. Björntorp, L. Sjöström, and U. Smith*

RAPID PUBLICATIONS

1163 Perfusion of isolated tubules of the shark rectal gland. Electrical characteristics and response to hormones. *J. N. Forrest, Jr., F. Wang, and K. W. Beyenbach*

1168 Transferable β-lactamase. A new mechanism for in vitro penicillin resistance in *Streptococcus faecalis*. *B. E. Murray and B. Mederski-Samaroj*

1314 Regulation of transferrin receptor expression on human leukemic cells during proliferation and induction of differentiation. Effects of gallium and dimethylsulfoxide. *C. R. Chitambar, E. J. Massey, and P. A. Seligman*

1326 Role of complement and polymorphonuclear cells in demethylchlortetracycline-induced phototoxicity in guinea pigs. Inhibition by decomplementation in vivo. *H. W. Lim, H. Novotny, and I. Gigli*

1336 Endogenous prostacyclin biosynthesis and platelet function during selective inhibition of thromboxane synthase in man. *G. A. FitzGerald, A. R. Brash, J. A. Oates, and A. K. Pedersen*

1344 Human upper epidermal cytoplasmic antibodies are directed against keratin intermediate filament proteins. *H. Hintner, P. M. Steinert, and T. J. Lawley*

1352 Immunoglobulin G inhibitor of thyroid-stimulating antibody is a cause of delay in the onset of neonatal Graves' disease. *M. Zakarija, J. M. McKenzie, and D. S. Munro*

1357 A monoclonal antibody to rhesus erythrocyte band 3 inhibits invasion by malaria (*Plasmodium knowlesi*) merozoites. *L. H. Miller, D. Hudson, J. Rener, D. Taylor, T. J. Hadley, and D. Zilberstein*

1365 Role of local prostaglandin synthesis in the modulation of proliferative activity of rat colonic epithelium. *P. A. Craven, R. Saito, and F. R. DeRubertis*

1376 Tissue oxygenation and muscular substrate turnover in two subjects with high hemoglobin oxygen affinity. *B. Wranne, G. Berlin, L. Jorfeldt, and N. Lund*

1385 Proximal tubular bicarbonate reabsorption and P_{CO_2} in chronic metabolic alkalosis in the rat. *D. A. Maddox and F. J. Gennari*

1396 Relationships between surface, volume, and thickness of iliac trabecular bone in aging and in osteoporosis. Implications for the microanatomic and cellular mechanisms of bone loss. *A. M. Parfitt, C. H. E. Mathews, A. R. Villanueva, M. Kleerekoper, B. Frame, and D. S. Rao*

1410 Suppression of in vitro monoclonal human rheumatoid factor synthesis by antiidiotypic antibody. Target cells and molecular requirements. *W. J. Koopman, R. E. Schrohenloher, J. C. Barton, and E. C. Greenleaf*

1420 Metabolism of estradiol in liver cell culture. Differential responses of C-2 and C-16 oxidations to drugs and other chemicals that induce selective species of cytochrome P-450. *J. Schneider, S. Sassa, and A. Kappas*

1427 A novel method for generating region-specific monoclonal antibodies to modified proteins. Application to the identification of human glucosylated low density lipoproteins. *L. K. Curtiss and J. L. Witztum*

1439 Glomerular prostaglandin and thromboxane synthesis in rat nephrotoxic serum nephritis. Effects on renal hemodynamics. *E. A. Lianos, G. A. Andres, and M. J. Dunn*

1449 Protoporphyrin hepatopathy. Effects of cholic acid ingestion in murine griseofulvin-induced protoporphyria. *M. B. Poh-Fitzpatrick, J. A. Sklar, C. Goldsman, and J. H. Lefkowitch*

1459 Antireceptor antibodies as probes of insulinlike growth factor receptor structure. *M. Kasuga, N. Sasaki, C. R. Kahn, S. P. Nissley, and M. M. Rechler*

1470 Direct determination of the driving forces for taurocholate uptake into rat liver plasma membrane vesicles. *M. C. Duffy, B. L. Blitzer, and J. L. Boyer*

1482 Impairment of the autologous mixed lymphocyte reaction in atopic dermatitis. *D. Y. M. Leung, J. A. Saryan, R. Frankel, M. Lareau, and R. S. Geha*

1487 Partial characterization and clinical correlation of circulating human immunoglobulins directed against thyrotrophin binding sites in guinea pig fat cell membranes. Development of a direct enzyme immunoassay. *J. R. Baker, Jr., Y. G. Lukes, R. C. Smallridge, M. Berger, and K. D. Burman*

1498 Acute reduction in human platelet α_2-adrenoreceptor affinity for agonist by endogenous and exogenous catecholamines. *A. S. Hollister, G. A. FitzGerald, J. H. J. Nadeau, and D. Robertson*

RAPID PUBLICATIONS

1506 Killing of intracellular *Leishmania donovani* by lymphokine-stimulated human mononuclear phagocytes. Evidence that interferon-γ is the activating lymphokine. *H. W. Murray, B. Y. Rubin, and C. D. Rothermel*

1511 Factors associated with humoral hypercalcemia of malignancy stimulate adenylate cyclase in osteoblastic cells. *S. B. Rodan, K. L. Insogna, A. M.-C. Vignery, A. F. Stewart, A. E. Broadus, S. M. D'Souza, D. R. Bertolini, G. R. Mundy, and G. A. Rodan*

1516 Specific receptors for leukotriene C_4 on a smooth muscle cell line. *S. Krilis, R. A. Lewis, E. J. Corey, and K. F. Austen*

1520 OCTOBER AUTHOR INDEX

NOVEMBER 1983 VOLUME 72 NUMBER 5

PERSPECTIVES

1521 Arachidonate metabolism in vascular disorders. *P. W. Majerus*

REGULAR ARTICLES

1526 Genetic polymorphism in C8 β-chains. Evidence for two unlinked genetic loci for the eighth component of human complement (C8). *C. A. Alper, D. Marcus, D. Raum, B. H. Petersen, and T. J. Spira*

1532 von Willebrand factor binds to platelets and induces aggregation in platelet-type but not type IIB von Willebrand disease. *J. L. Miller, J. M. Kupinski, A. Castella, and Z. M. Ruggeri*

1543 Complementation studies of isovaleric acidemia and glutaric aciduria type II using cultured skin fibroblasts. *B. Dubiel, C. Dabrowski, R. Wetts, and K. Tanaka*

1553 Relationship of an abnormal plasma lipoprotein to protection from atherosclerosis in the cholesterol-fed diabetic rabbit. *P. Brecher, A. V. Chobanian, D. M. Small, W. Van Sickle, A. Tercyak, A. Lazzari, and J. Baler*

1563 Effects of energy delivery via a His bundle catheter during closed chest ablation of the atrioventricular conduction system. *J. L. Trantham, J. J. Gallagher, L. D. German, A. Broughton, T. Guarnieri, and J. Kasell*

1575 Regulation of rat liver hydroxymethylglutaryl coenzyme A reductase by a new class of noncompetitive inhibitors. Effects of dichloroacetate and related carboxylic acids on enzyme activity. *P. W. Stacpoole, H. J. Harwood, Jr., and C. E. Varnado*

1586 Inhibition of gastrin release by secretin is mediated by somatostatin in cultured rat antral mucosa. *M. M. Wolfe, G. M. Reel, and J. E. McGuigan.*

1594 Dogs with experimental cirrhosis of the liver but without intrahepatic hypertension do not retain sodium or form ascites. *B. Unikowsky, M. J. Wexler, and M. Levy*

1605 Effect of muscle glycogen depletion on in vivo insulin action in man. *C. Bogardus, P. Thuillez, E. Ravussin, B. Vasquez, M. Narimiga, and S. Azhar*

1611 Regulation of high density lipoprotein receptor activity in cultured human skin fibroblasts and human arterial smooth muscle cells. *J. F. Oram, E. A. Brinton, and E. L. Bierman*

1622 Concentrations of an activator protein for sphingolipid hydrolysis in liver and brain samples from patients with lysosomal storage diseases. *K. Inui and D. A. Wenger*

1629 Depression of the lymphocyte transformation response to microbial antigens and to phytohemagglutinin during pregnancy. *R. C. Brunham, D. H. Martin, T. W. Hubbard, C.-C. Kuo, C. W. Critchlow, L. D. Cles, D. A. Eschenbach, and K. K. Holmes*

1639 Identification and structural characterization of two incompletely processed forms of the fourth component of human complement. *A. C. Chan and J. P. Atkinson*

1650 Hyper IgM immunodeficiency. A primary dysfunction of B lymphocyte isotype switching. *D. Levitt, P. Haber, K. Rich, and M. D. Cooper*

1658 Arachidonic acid and prostaglandin endoperoxide metabolism in isolated rabbit and coronary microvessels and isolated and cultivated coronary microvessel endothelial cells. *M. E. Gerritsen and C. D. Chelt*

1672 Human plasma kallikrein releases neutrophil elastase during blood coagulation. *Y. T. Wachtfogel, U. Kucich, H. L. James, C. F. Scott, M. Schapira, M. Zimmerman, A. B. Cohen, and R. W. Colman*

1678 Kinins are generated in vivo following nasal airway challenge of allergic individuals with allergen. *D. Proud, A. Togias, R. M. Naclerio, S. A. Crush, P. S. Norman, and L. M. Lichtenstein*

1686 Impaired T cell capping and receptor regeneration in active systemic lupus erythematosus. Evidence for a disorder intrinsic to the T lymphocyte. *G. M. Kammer*

1698 Alteration of membrane phospholipid bilayer organization in human erythrocytes during drug-induced endocytosis. *S. L. Schrier, D. T.-Y. Chiu, M. Yee, K. Sizer, and B. Lubin*

1706 Cleavage and inactivation of Factor IX by granulocyte elastase. *A. Takaki, D. L. Enfield, and A. R. Thompson*

1716 Blood flow dependence of postglomerular fluid transfer and glomerulotubular balance. *V. Kon and I. Ichikawa*

1729 Studies of liver insulin receptors in non-obese and obese human subjects. *P. Arner, K. Einarsson, L. Backman, K. Nilsell, K. M. Lerea, and J. N. Livingston*

1737 Effect of fatty acids on glucose production and utilization in man. *E. Ferrannini, E. J. Barrett, S. Bevilacqua, and R. A. DeFronzo*

1748 Plasma *l*-[^{3}H]norepinephrine, *d*-[^{14}C]norepinephrine, and *d,l*-[^{3}H]isoproterenol kinetics in essential hypertension. *D. S. Goldstein, D. Horwitz, H. R. Keiser, R. J. Polinsky, and I. J. Kopin*

1759 Platelet-derived growth factor stimulates mouse 3T3 cell mitogenesis and leukocyte chemotaxis through different structural determinants. *L. T. Williams, H. N. Antoniades, and E. J. Goetzl*

1764 Albumin-mediated transport of rose bengal by perfused rat liver. Kinetics of the reaction at the cell surface. *E. L. Forker and B. A. Luxon*

1772 Tissue content of dihydrotestosterone in human prostatic hyperplasia is not supranormal. *P. C. Walsh, G. M. Hutchins, and L. L. Ewing*

1778 Sources and quantity of 3,5,3'-triiodothyronine in several tissues of the rat. *J. van Doorn, D. van der Heide, and F. Roelfsema*

1793 Alkalinizing the intralysosomal pH inhibits degranulation of human neutrophils. *M. S. Klempner and B. Styrt*

1801 Mechanisms of pulmonary fibrosis. Spontaneous release of the alveolar macrophage-derived growth factor in the interstitial lung disorders. *P. B. Bitterman, S. Adelberg, and R. G. Crystal*

1814 An in vivo and in vitro study of the mechanism of prednisone-induced insulin resistance in healthy subjects. *G. Pagano, P. Cavallo-Perin, M. Cassader, A. Bruno, A. Ozzello, P. Masciola, A. M. Dall'omo, and B. Imbimbo*

1821 Nature and quantity of fuels consumed in patients with alcoholic cirrhosis. *O. E. Owen, V. E. Trapp, G. A. Reichard, Jr., M. A. Mozzoli, J. Moctezuma, P. Paul, C. L. Skutches, and G. Boden*

1833 Influence of augmented Hageman factor (Factor XII) titers on the cryoactivation of plasma prorenin in women using oral contraceptive agents. *E. M. Gordon, J. Douglas, and O. D. Ratnoff*

RAPID PUBLICATIONS

1839 Leukotriene biosynthesis by polymorphonuclear leukocytes from two patients with chronic granulomatous disease. *S. J. Feinmark, A.-M. Udén, J. Palmblad, and C. Malmsten*

1844 Bromodeoxyuridine in tumors and chromosomes detected with a monoclonal antibody. *G. Morstyn, S.-M. Hsu, T. Kinsella, H. Gratzner, A. Russo, and J. B. Mitchell*

1851 Direct regulation by calcium of cytoplasmic messenger ribonucleic acid coding for pre-proparathyroid hormone in isolated bovine parathyroid cells. *J. Russell, D. Lettieri, and L. M. Sherwood*

1856 Metabolism of 25-hydroxyvitamin D_3 by cultured pulmonary alveolar macrophages in sarcoidosis. *J. S. Adams, O. P. Sharma, M. A. Gacad, and F. R. Singer*

1861 NOVEMBER AUTHOR INDEX

DECEMBER 1983 VOLUME 72 NUMBER 6

PERSPECTIVES

1863 Regulation of contractile proteins by phosphorylation. *R. S. Adelstein*

REGULAR ARTICLES

1867 Biosynthesis and release of thyrotropin-releasing hormone immunoreactivity in rat pancreatic islets in organ culture. Effects of age, glucose, and streptozotocin. *L. Ø. Dolva, J. H. Nielsen, B. S. Welinder, and K. F. Hanssen*

1874 Enhanced survival in *Pseudomonas aeruginosa* septicemia associated with high levels of circulating antibody to *Escherichia coli* endotoxin core. *M. Pollack, A. I. Huang, R. K. Prescott, L. S. Young, K. W. Hunter, D. F. Cruess, and C.-M. Tsai*

1882 Concentrations of prostaglandin endoperoxide synthase and prostaglandin I_2 synthase in the endothelium and smooth muscle of bovine aorta. *D. L. DeWitt, J. S. Day, W. K. Sonnenburg, and W. L. Smith*

1889 Purine metabolism in myeloid precursor cells during maturation. Studies with the HL-60 cell line. *D. L. Lucas, H. K. Webster, and D. G. Wright*

1901 Improvement in in vitro insulin action after one month of insulin therapy in obese noninsulin-dependent diabetics. Measurements of glucose transport and metabolism, insulin binding, and lipolysis in isolated adipocytes. *J. E. Foley, A. Kashiwagi, M. A. Verso, G. Reaven, and J. Andrews*

1910 Myocardial hydroxyproline and mechanical response to prolonged pressure loading followed by unloading in the cat. *J. F. Williams, Jr., B. Mathew, D. L. Hern, R. D. Potter, and W. P. Deiss, Jr.*

1918 Selective deficiency of immunoglobulin A2. *E. van Loghem, B. J. M. Zegers, E. J. E. G. Bast, and L. Kater*

1924 DNA synthesis is not necessary for osteoclastic responses to parathyroid hormone in cultured fetal rat long bones. *J. A. Lorenzo, L. G. Raisz, and J. M. Hock*

1930 Regulation of bile acid synthesis in man. Presence of a diurnal rhythm. *W. C. Duane, D. G. Levitt, S. M. Mueller, and J. C. Behrens*

1937 Metabolism of methylmalonic acid in rats. Is methylmalonyl-coenzyme A racemase deficiency symptomatic in man? *J. A. Montgomery, O. A. Mamer, and C. R. Scriver*

1948 Role of the terminal complement pathway in experimental membranous nephropathy in the rabbit. *G. C. Groggel, S. Adler, H. G. Rennke, W. G. Couser, and D. J. Salant*

1958 Insulin receptors in isolated human adipocytes. Characterization by photoaffinity labeling and evidence for internalization and cellular processing. *P. Berhanu, O. G. Kolterman, A. Baron, P. Tsai, J. M. Olefsky, and D. Brandenburg*

1971 Unique efficiency of methionine metabolism in premenopausal women may protect against vascular disease in the reproductive years. *G. H. Boers, A. G. Smals, F. J. Trijbels, A. I. Leermakers, and P. W. Kloppenborg*

1977 Lung injury edema in dogs. Influence of sympathetic ablation. *I. M. Dauber and J. V. Weil*

1987 Monoclonal lupus autoantibody secretion by human-human hybridomas. Selection of hybrids by conventional and novel techniques. *B. H. Littman, A. V. Muchmore, A. D. Steinberg, and W. C. Greene*

1995 Heterogeneity of the molecular lesions in inherited phosphofructokinase deficiency. *S. Vora, M. Davidson, C. Seaman, A. F. Miranda, N. A. Noble, K. R. Tanaka, E. P. Frenkel, and S. Dimauro*

2007 Specific uptake of radioiodinated Fragment E_1 by venous thrombi in pigs. *L. C. Knight, S. A. Olexa, L. S. Malmud, and A. Z. Budzynski*

2014 Bacterial lipopolysaccharides induce in vitro degradation of cartilage matrix through chondrocyte activation. *H. E. Jasin*

2020 Somatostatin inhibits rat hepatic T_4-5'-deiodinase. The effect is independent of the associated hypoinsulinemia. *L. A. Gavin and M. Moeller*

2031 Endogenous opiates modulate the pulsatile secretion of biologically active luteinizing hormone in man. *J. D. Veldhuis, A. D. Rogol, M. L. Johnson, and M. L. Dufau*

2041 Regulation of Factor X_a in vitro in human and mouse plasma and in vivo in mouse. Role of the endothelium and plasma proteinase inhibitors. *H. E. Fuchs and S. V. Pizzo*

2050 Characterization of acidification in the cortical and medullary collecting tubule of the rabbit. *M. E. Laski and N. A. Kurtzman*

2060 Functional heterogeneities among concanavalin A-activated $OKT4^+$ and $OKT8^+$ cells by using autologous erythrocyte rosette technique. *S. Takada, Y. Ueda, Y. Murakawa, N. Suzuki, and T. Sakane*

2072 Soluble suppressor factors in patients with acquired immune deficiency syndrome and its prodrome. Elaboration in vitro by T lymphocyte-adherent cell interactions. *J. Laurence, A. B. Gottlieb, and H. G. Kunkel*

2082 Bleomycin-induced pulmonary fibrosis in hamsters. An alveolar macrophage product increases fibroblast prostaglandin E_2 and cyclic adenosine monophosphate and suppresses fibroblast proliferation and collagen production. *J. G. Clark, K. M. Kostal, and B. A. Marino*

2092 Activation of antigen-specific suppressor T cells in the presence of cyclosporin requires interactions between T cells of inducer and suppressor lineage. *N. Mohagheghpour, C. J. Benike, G. Kansas, C. Bieber, and E. G. Engleman*

2101 Localization of ^{131}I-labeled p97-specific Fab fragments in human melanoma as a basis for radiotherapy. *S. M. Larson, J. A. Carrasquillo, K. A. Krohn, J. P. Brown, R. W. McGuffin, J. M. Ferens, M. M. Graham, L. D. Hill, P. L. Beaumier, K. E. Hellström, and I. Hellström*

2115 Defect in the sodium-modulated tissue responsiveness to angiotensin II in essential hypertension. *D. M. Shoback, G. H. Williams, T. J. Moore, R. G. Dluhy, S. Podolsky, and N. K. Hollenberg*

2125 Investigation of tubular handling of bicarbonate in man. A new approach utilizing stable carbon isotope fractionation. *Z.-H. Burbea, B. Luz, B. Lazar, J. Winaver, and O. S. Better*

2137 A high molecular weight form of somatostatin-$28_{(1-12)}$-like immunoreactive substance without somatostatin-14 immunoreactivity in the rat pancreas. Evidence that somatostatin-14 synthesis can occur independently of somatostatin-28. *Y. C. Patel*
